Demo Modernisation Checklist

About this sample

This is a dummy publication created to test the website CMS, PDF downloads and related case-study links. The content is illustrative and describes no real client engagement.

Suggested approach

Map the existing application, agree on a focused change and validate each release with the people using it.

Review checklist

Confirm that the file opens correctly, the card image and description display as expected, and the download remains available while its CMS item is published.

Before production use

Replace this demonstration file with reviewed and approved material. Its title and contents intentionally identify it as a sample.
